

Snow Removal Requests

The Nagano Prefecture Snow Management Council aims to create a snow-resilient region through the collaboration between local residents and related government authorities by disseminating information to related parties.

Do not dump snow onto the road as it will slow down snow removal work and may cause traffic accidents and congestion. Snow on the roof should also be managed properly as it may cause life-threatening accidents.

Due to the structure of the snowplow, snow will inevitably accumulate at your front door and driveway after snow removal. We apologize for any inconvenience caused.
